Five students from Slatina received delightful news during this period, becoming beneficiaries of scholarships generously awarded by the Soroptimist International Slatina Club. These financial aids are intended to support the continuation of their studies, thus giving them the opportunity to follow their academic and professional dreams.

The Soroptimist Slatina Club continues to invest in the education of young people facing financial difficulties. It is about the "We support the excellence of children from disadvantaged families" project, through which, again this year, several very good students receive financial aid to continue their studies.

As a sign of gratitude for the continuous support received, the students who have been receiving this financial aid for several years sent an emotional message.

Also, this month, within the "Teenage mothers" project, the club representatives offered support to underage mothers and their babies.
